

**Delmarva Power**  
**Annual Small Generator Interconnection Report**  
**Delaware**  
**As of December 31, 2011**

| The total number of and the nameplate capacity of the interconnection requests received, approved or denied under Level 1, Level 2, Level 3 and Level 4 |                        |                      |                        |                      |                        |                      |                        |                      |            |                   |
|---|------------------------|----------------------|------------------------|----------------------|------------------------|----------------------|------------------------|----------------------|------------|-------------------|
| Applications Received 2011  | # Level 1 Applications | kW Capacity: Level 1 | # Level 2 Applications | kW Capacity: Level 2 | # Level 3 Applications | kW Capacity: Level 3 | # Level 4 Applications | kW Capacity: Level 4 | Total #App | Total kW capacity |
| Approved  | 66                     | 449.41               | 12                     | 3823.4               | 0                      | N/A                  | 0                      | N/A                  | 78         | 4272.81           |
| Denied  | 0                      | N/A                  | 0                      | N/A                  | 0                      | N/A                  | 0                      | N/A                  | 0          | 0                 |
| In Progress   | 78                     | 443.545              | 17                     | 2749.62              | 0                      | N/A                  | 0                      | N/A                  | 95         | 3193.165          |
| Level Total   | 144                    | 892.955              | 29                     | 6573.02              | 0                      | N/A                  | 0                      | N/A                  | 173        | 7465.975          |

| The fuel type, total number and the nameplate capacity of small generator facilities <i>approved</i> in each of the following categories, net metering, emergency standby capable of operating in parallel, behind the meter load offset, combined heat and power, other; |                |                          |                        |                               |                                |  |                           |                                     |  |  |
|---|----------------|--------------------------|------------------------|-------------------------------|--------------------------------|--|---------------------------|-------------------------------------|--|--|
| Systems Approved 2011   | # Net Metering | Net Metering kW Capacity | # Emergency Standby kW | Emergency Standby kW Capacity | # Behind the Meter Load Offset | Behind the Meter Load Offset kW Capacity | # Combined Heat and Power | Combined Heat and Power kW Capacity |  |  |
| Solar   | 78             | 4272.81                  | 0                      | N/A                           | 0                              | N/A                                      | 0                         | N/A                                 |  |  |

| The number of interconnection requests that were not processed within the deadlines established for Level 1, Level 2, Level 3 and Level 4 reviews <sup>1</sup> |                      |         |         |  |
|--|----------------------|---------|---------|--|
| Level 1 <sup>1</sup>   | Level 2 <sup>1</sup> | Level 3 | Level 4 |  |
| 25   | 5                    | 0       | 0       |  |

| The number of interconnection requests denied and the application, the address of the proposed small generator, and the reason for each denial. |  |
|---|--|
| 0   |  |

<sup>1</sup> Includes applications processed after the new interconnection rules went into affect (8/8/2011)
